| <u>Objective and Strategy</u>                  | <u>Concrete</u>  | <u>Pictorial</u>   | <u>Abstract</u>  |
| <b>Use of a number line to count backwards</b> |  | Year 2 – use of a blank number line to build on from work in Year 1<br> A horizontal number line with a starting point at 7 and an ending point at 13. The number 13-6 is written above the line. There are six wavy lines drawn below the line between 7 and 13, representing counting backwards.         |  |
| <b>Make 10</b>                                 | 14 – 5 =<br> Three ten-frames. The first two are full of purple cubes (14). The third has 4 cubes in the top row and 1 cube in the bottom left. Below the frames, the text says: "14 take away the 4 to make 10. The take away the other 1 = 9".<br>14 take away the 4 to make 10.<br>The take away the other 1 = 9               |  A horizontal number line with points at 6, 10, and 13. The equation 13-7=6 is written above. A bracket from 13 to 10 is labeled -4. A bracket from 10 to 7 is labeled -3.<br>13 minus 3 to make 10. Then subtract the remaining 4   | 16 – 8 = 8<br><br>How many do we take off first to get to 10? How many are left to take off? |
| <b>Partitioning without regrouping</b>         | Use Numicon or base ten to show how to partition and subtract without regrouping.<br><br>44 - 13<br> Base ten blocks representing 44 (four tens rods and four ones units) and 13 (one ten rod and three ones units). The text says: "Children make both numbers and then physically remove the 13 from the 44."<br>40 4<br>10 3 |  Base ten blocks representing 43 (four tens rods and three ones units). One ten rod is crossed out with a diagonal line, and one one unit is also crossed out. The text says: "Children cross off the number after drawing base ten."<br>43 – 21<br>Children cross off the number after drawing base ten. | 43 – 21<br><br>40 + 3<br>- 20 + 1<br><hr style="width: 50px; margin-left: 0;"/> 20 + 2 = 22  |

|---|--|---|--|
| <p><b>Multiplication is commutative</b></p>                             | <p>Create arrays using counters, cubes and Numicon</p>  <p>Children need to understand multiplication can be done in any order and that the answer is not affected.</p>  | <p>Children draw the arrays to demonstrate their understanding.</p>    | <p><math>12 = 3 \times 4</math><br/> <math>12 = 4 \times 3</math></p> <p>Use an array to write multiplication sentences and reinforce repeated addition.</p>  <p><math>5 + 5 + 5 = 15</math><br/> <math>3 + 3 + 3 + 3 + 3 = 15</math><br/> <math>5 \times 3 = 15</math><br/> <math>3 \times 5 = 15</math></p> |
| <p><b>Using the inverse</b><br/> <b>(Taught alongside division)</b></p> | <p>Create arrays using counters, cubes and Numicon and match to the calculations verbally.</p>  <p><math>2 \times 4 = 8</math><br/> <math>4 \times 2 = 8</math><br/>             8 shared between 2 = 4<br/>             8 shared between 4 is 2</p>     | <p>Children draw triangles to show fact families using understanding that is multiplication is commutative and links to division.</p>  | <p><math>2 \times 4 = 8</math><br/> <math>4 \times 2 = 8</math><br/> <math>8 \div 2 = 4</math><br/> <math>8 \div 4 = 2</math></p> <p><math>8 = 2 \times 4</math><br/> <math>8 = 4 \times 2</math><br/> <math>4 = 8 \div 2</math><br/> <math>2 = 8 \div 4</math></p> <p>Show all related multiplication and division facts in fact family sentences.</p>  |

| <b>Division Year 2</b>               |  |  |  |
|--------------------------------------|--|--|--|
| <b><u>Objective and Strategy</u></b> | <b><u>Concrete</u></b>   | <b><u>Pictorial</u></b>  | <b><u>Abstract</u></b>   |
| <b>Division as grouping</b>          | <p>Divide quantities into equal groups using cubes, counters and objects to support understanding.</p>  | <p>Use number lines for grouping.</p>  <p>Think of the bar as a whole. Split it into the number of groups you are dividing by and work out how many there would be in each group either by drawing in the bar or knowledge of tables.</p> <p>Eg</p>  | <p><math>28 \div 7 = 4</math></p> <p>Divide 28 into 7 groups. How many are in each group?</p> <p>How many groups of 6 are in 24?</p> |
| <b>Repeated subtraction</b>          | <p>Children repeatedly subtract in groups of a number.<br/>Eg <math>6 \div 2 = 3</math></p>           | <p>Children represent this repeated subtraction by drawing on a number line.</p>   | Blank number line  |

|                                    |  |   |   |
|------------------------------------|--|---|---|
| <p><b>Division with arrays</b></p> | <p>Link division to multiplication by creating an array and thinking about the number sentences that can be created.</p>  <p>Verbally explain sentences</p> $15 \div 3 = 5$ $15 \div 5 = 3$ $5 \times 3 = 15$ $3 \times 5 = 15$ | <p>Children draw an array and use lines to split the array in to groups to make multiplication and division sentences.</p>  | <p>Find the inverse of multiplication and division sentences by creating eight linking number sentences.</p> $7 \times 4 = 28$ $4 \times 7 = 28$ $28 \div 7 = 4$ $28 \div 4 = 7$<br>$28 = 7 \times 4$ $28 = 4 \times 7$ $4 = 28 \div 7$ $7 = 28 \div 4$ |
|------------------------------------|--|---|---|
